# Admiralty e-Navigator

## Intuitive Ocean Intelligence

Admiralty e-Navigator is a computer based navigation information system designed and developed by the United Kingdom Hydrographic Office. Its aim is to make life easier and simpler for our maritime customers – both at sea and ashore. Admiralty e-Navigator will also help the maritime community to be ready for the implementation of the 2012 ECDIS Mandate.

Admiralty e-Navigator allows instant access to all Admiralty navigation tools and data, whether you are sitting in the office managing your fleet, or at sea on the bridge of your vessel.

Admiralty e-Navigator provides access to other popular maritime products including; Maris Weather Manager; Lloyds Register Fairplay World Ports Guide and DNV Navigator.

Admiralty e-Navigator enables you to view, select and order all the charts and publications you will need to plan your voyage. You will save time and money as Admiralty e-Navigator will work out the most cost effective way for you to get from port to port. If you need to make any changes or alterations while you are at sea, Admiralty e-Navigator will give you instant access and allow you to order all of the information you will need.

## Intuitive Ocean Intelligence

### Save Time

All the paper and digital information needed to plan safe voyages and simplify essential tasks.

Organise, maintain and display your Admiralty products including:

- Admiralty Vector Charts (AVCS)
- Admiralty Information Overlay (AIO)
- Admiralty Raster Charts (ARCS)
- Admiralty TotalTide

Quickly identify any gaps in your holdings and get instant access to the latest navigational information you need – wherever you are in the world.

### Save Money

Plot a route and identify the best mix of products needed to navigate safely, compliantly and cost effectively.

- Licensing flexibility gives you the option to buy what you need
- Instant availability so you only pay when you need it
- Buy products for as long as you need them (3, 6, 9 or 12 months)

### Build Confidence

Admiralty e-Navigator is a new and powerful tool designed and developed to the same Admiralty standards you are used to.

You can be confident that the same care and attention to detail has been applied to all Admiralty digital products that has been applied over the years to our paper charts.

Developed in collaboration with some of the world's leading shipping companies, Admiralty e-Navigator combines the quality, reliability and integrity of Admiralty information and is setting the new standard for marine navigation.

## Value Added Products and Services

### Admiralty Passage Planning

A new application which can generate a complete voyage plan including ship loading and trim details, squat calculation, port and pilot information.

### Third Party products accessible through e-Navigator

- Paper Chart Updating services
- Maris Weather Manager
- Lloyds Register – Fairplay World Ports Guide
- DNV Navigator

Contact your distributor to find out more about prices.

### The Future of Navigation

A growing number of new and innovative products and services will enable you to gain and maintain your competitive advantage.

Admiralty e-Navigator will provide the platform to support future products and services.

Tailor Admiralty e-Navigator to your needs by adding additional services such as passage planning, weather and vessel optimisation applications.

A computer based training package is available to enable you to take full advantage of all the benefits and facilities that Admiralty e-Navigator offers.

### Be ahead of the game

The timetable of the 2012 ECDIS Mandate means it makes economic and commercial sense to plan your transition. We recognise that your vessels will already have Admiralty products on board. Admiralty e-Navigator will not only enhance what you already own, it will give you a faster, more efficient way of selecting and managing all of the navigation tools and data that you need to be compliant now and in the future.

### Information at your Fingertips

Having the right data is essential to good planning. Admiralty e-Navigator helps you only buy the charts you need, for when you need them, providing the very latest navigational information and enabling you to plan safe voyages.

With Admiralty e-Navigator you have access to the very latest data 24/7, wherever you are in the world. Admiralty e-Navigator delivers information in small data packages, this method makes it possible to download essential data, easily, reliably and cost effectively.

You can have confidence that you are making the very best of your resources.

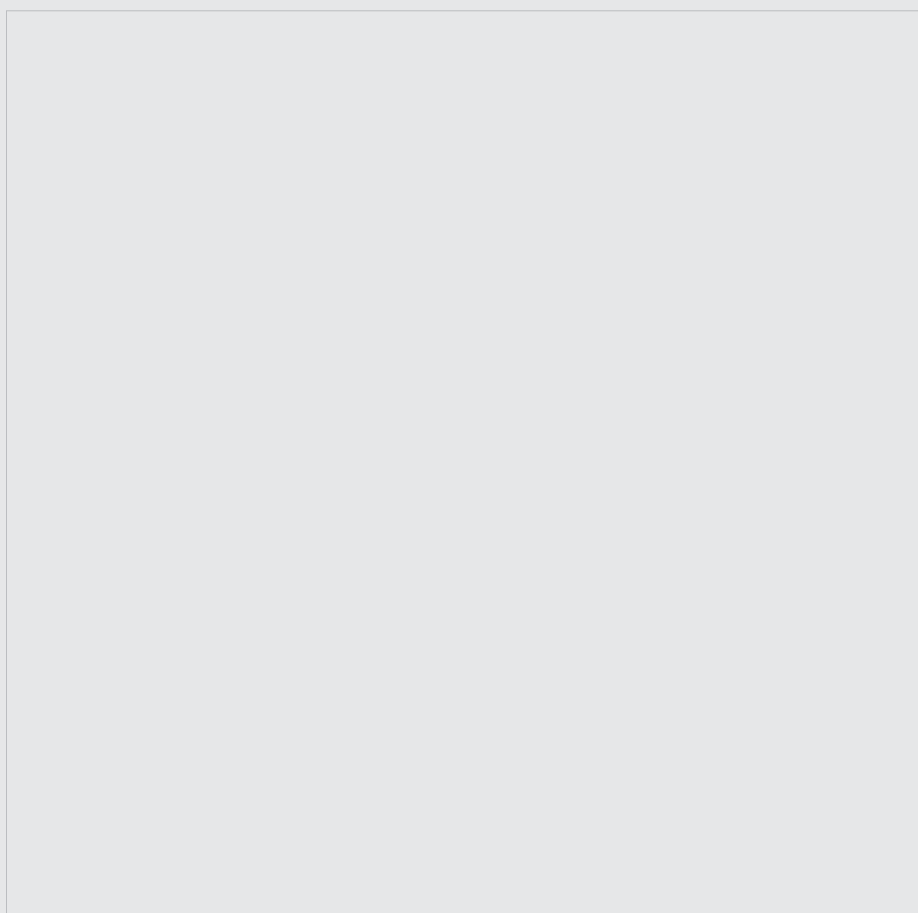

...because safety matters
